

# Deaf and Hearing Impaired Children Europe 2005

London · 13-14 May 2005

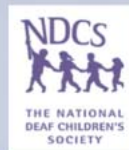

## ***Promoting joined-up working for Europe's professionals with deaf children and their families***

Hearing services for children are being transformed by the implementation of new born screening programmes and the development of new diagnostic technologies and communication developments. There are challenges for all the professional disciplines involved to provide equitable, high quality services across Europe. This meeting will:

- Bring together the European organisations of professionals working with deaf children, together with parent groups
- Promote joined-up working for families, children and young people
- Share parents' and young people's experiences
- Share examples of good practice
- Explore the differing perspectives of different agencies
- Explore the challenges of multi-professional working
- Promote public awareness of the implications of childhood deafness
- Promote the interests of deaf children on the EU's agenda

### ***International faculty***
